## LCDG-SPM/DPM

## coupole series - Drop globe -

### Luminaire

Ballast housing is fabricated of heavy-duty cast aluminum. Spun aluminum shade is fastened directly to the ballast housing. Spun aluminum refractor holder secures the refractor and is enclosed with a clear polycarbonate globe.

### Mounting

Pole mounted luminaires are available with a wide variety of arms. Please see the "Bases, poles and mountings" page for some mounting options.

### Optics

Type III or type V distribution available.

### Protection

The luminaire is completely protected from water and dust. A spun aluminum holder retains the tempered glass refractor. Cast aluminum ballast housing is sealed with a cast aluminum plate which is gasketed.

### Maintenance

The lamp can be replaced easily through removing the polycarbonate globe.

### Electrical

Standard metal halide and high-pressure sodium luminaires are supplied with core and coil CSA/UL listed ballasts. All ballasts are guaranteed for at least 2 years directly from the ballast manufacturer. Components are horizontally opposed for thermal reduction. All components are mounted on a single plate for easy maintenance.

Pulse start metal halide luminaires are supplied with standard uniform pulse start systems suitable for universal lamp mounting. All components are mounted on a single plate for easy maintenance. Pulse start systems are guaranteed directly from the manufacturer for a period of 5 years.

Compact fluorescent: All compact fluorescent luminaires are supplied with electronic ballasts. Consult factory for dimming ballast to match controls and ballasts. Where the luminaire uses multiple ballasts, the ballasts are mounted on a single plate and can be individually removed.

See "Bases, poles and mountings" page for more options
