### Housing

Heavy-duty cast aluminum ballast housing is attached to a cast aluminum decorative lens holder. Electrical compartment is isolated from optical chamber.

### Optics

Anodized aluminum reflector surrounds the lamp; uniform light is diffused through opal lens.

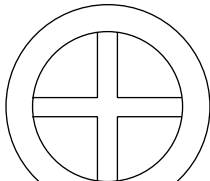

### Finish

Hot solvent degreasing and cleaning process is performed before painting. Powder coated paint is applied on marine grade aluminum to prevent any possible decay caused by salt spray.

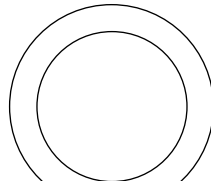

### Maintenance

Reflector must be removed for access to the ballast.

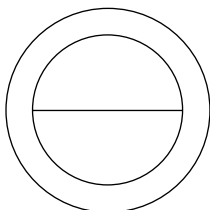

### Decorative cover options

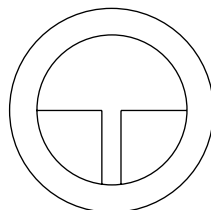

Type "G" (grid)

Type "N" (none)

Type "EL" (eyelid)

Type "ELS" (eyelid/strand)
